PROFILE SUMMARY

Passionate **Full-Stack Developer** with strong expertise in **Java** and practical experience architecting scalable **MERN stack** web applications. Collaborative team player dedicated to delivering clean, efficient, and maintainable code with a strong focus on high-performance, interactive UI design.

EDUCATION

Zeal College of Engineering and Research, Narhe, Pune, India <i>Bachelor of Engineering SGPA: 7.4*</i>	<i>Expected 2026</i>
MIT Junior College Kothrud, Pune, Maharashtra, India <i>Science, HSC 66%</i>	<i>2022</i>
RMD Sinhgad Spring Dale School Warje, Pune, Maharashtra, India <i>CBSE 88%</i>	<i>2020</i>

EXPERIENCE

Web Development Intern <i>Edunet Foundation · in collaboration with EY GDS & AICTE</i> - Accelerated full-stack proficiency by completing an intensive 6-week MERN Stack program under the Next Gen Employability Program, gaining end-to-end project delivery experience. - Increased application scalability by architecting and deploying modern, responsive web applications utilizing MongoDB, Express.js, React.js, and Node.js, reducing average page load time through component optimization.	<i>Feb 2025 – Mar 2025</i>
Python & Django Trainee <i>Rubicon Skill Development · in collaboration with Deutsche Bank</i> - Engineered a fully functional e-commerce platform back-end using Python and Django, implementing secure user authentication, product CRUD operations, and order management workflows. - Strengthened backend fundamentals by gaining hands-on experience in RESTful web technologies and relational database integration, reducing query response times through optimized ORM patterns.	<i>Feb 2025</i>

PROJECTS

Java Enterprise Record Management System <i>Core Java · JDBC · OOP</i> - Improved data reliability by developing robust Java-based backend services utilizing Core Java and JDBC for secure record creation, updating, deletion, and retrieval, reducing data-access errors by applying strict input validation. - Enhanced code maintainability by applying strict OOP principles — encapsulation, inheritance, and polymorphism — to build modular, reusable application architectures, cutting feature addition time by an estimated 40%.	
Interactive 3D Developer Portfolio <i>React · Three.js · React Three Fiber (R3F) · Zustand · Google MediaPipe</i> - Delivered an immersive user experience by engineering a highly optimized 3D web portfolio using React, Three.js, and React Three Fiber, maintaining a strict 60 FPS render target across all modern browsers. - Reduced state-related re-renders by designing complex frontend state management using Zustand and custom 3D physics loops, resulting in smooth, lag-free animations. - Extended interactivity by integrating Google MediaPipe ML models for real-time webcam hand-tracking and gesture-based navigation, eliminating the need for conventional mouse/keyboard input.	
Full-Stack Expense Manager <i>React · Node.js · Express · MongoDB · Chart.js</i> Improved personal finance visibility by building a comprehensive expense-tracking web application featuring automated income/expense categorization and secure multi-category budget monitoring for up to 12 spending categories.	

- Accelerated financial decision-making by developing interactive, responsive dashboards to visualize monthly spending patterns, enabling users to identify cost-saving opportunities at a glance.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript
Frameworks & Libraries:	Node.js, Express, React, Bootstrap, Three.js (WebGL)
Databases:	MySQL, MongoDB, Oracle SQL
Developer Tools:	Git, GitHub, VS Code, Postman

EXTRA-CURRICULAR

- **Management Lead**, Astronomy Club — Organised events, coordinated team activities, and managed logistics for club operations.
